

## CETECOM further extends Visa type approval testing portfolio in the US

**Summary:** CETECOM is now accredited to perform Visa Paywave Contactless Type Approval Testing in our US laboratory in Milpitas, California.

**October 4, 2016 / Milpitas, Silicon Valley** – CETECOM, the premier wireless test and certification lab, is recognized for its expertise in globally provided [SmartCard service offerings](#). Visa has now accredited CETECOM's US laboratory in Milpitas, California to perform Visa Paywave Contactless Type Approval Testing.

This new Visa accreditation extends the CETECOM testing and certification services for terminals in the US, and it further completes the SmartCard Technology competences, which include Visa Mobile Payment Testing (Contactless Level 1) amongst a wide range of payment related testing, consulting, and certification services.

“The new accreditation is again a great accomplishment for our team”, says CETECOM CEO Wilfried Klassmann. “It helps us to enhance our high quality SmartCard portfolio in the US and strengthens our position as one of the top SmartCard laboratories globally.”

### About CETECOM

For over twenty years, CETECOM has been renowned as an independent test laboratory for mobile phones and other wireless devices. With over 400 employees and test labs in Europe, North America and Asia, CETECOM offers a unique service portfolio servicing the entire range of cellular and consumer wireless products. CETECOM is a leading test and certification lab for smart cards, RFID and NFC applications.

CETECOM provides testing services, consulting and training for wireless technologies: Cellular, Bluetooth, Wi-Fi, NFC and other systems. The company also performs a wide range of testing in the areas of mobile software applications, OTA, SAR, FCC, and EMC, field trials, acoustics, batteries and accessories.
