iscoord completes interoperability of UC softphones with BroadSoft BroadWorks

iscoord's portfolio is now supporting SIP, CTI and Remote Management with BroadWorks rel. 17.0

PRESS RELEASE

ZURICH, SWITZERLAND. March 31, 2011 - iscoord ag, a leading provider of award-winning Unified Communications (UC) software clients, today announced that its is-phone UC softphone portfolio has successfully completed interoperability testing with BroadSoft's BroadWorks® platform. In an on-going effort to leverage the rich UC capabilities of the BroadWorks platform, iscoord has launched a new line of UC softphones - "is-phone BroadWorks edition" series - which include enterprise telephony, HD audio and video conferencing, native CTI, CommExpress support, BroadWorks web portal synchronization and BroadWorks remote management support.

"More and more service providers are facing the erosion of their voice revenues, looking to introduce new services like instant messaging, enterprise telephony, conferencing or presence" said Markus Sieger, CEO of iscoord. "By completing interoperability with BroadWorks, iscoord is enabling service providers to offer their subscribers a complete, seamlessly integrated UC solution."

"We are underscoring the BroadWorks's platform ability to bring rich enterprise telephony capabilities directly to the end-user" said Rolf Kuster, CTO of iscoord. "To complement the BroadWorks platform, we implemented extensions like telephony presence, HD video conferencing, messaging services and file transfer, providing a richer communications experience for the end-users utilizing BroadWorks."

"One of our core strategies is to encourage interoperability testing of our BroadWorks platform with end-user devices to ensure a superior communications experience," said Joseph Harsch, Director of Product Management, BroadSoft. "We believe devices such as the iscoord UC Softphone with its broad UC capabilities, when used with the BroadWorks platform, will help service providers differentiate their offerings and to reach new market segments."
