SECUDE receives "SAP Partner Innovation Award 2012" as the best partner for SAP NetWeaver Single Sign-On

IT solutions provider SECUDE impresses with solution for secured Single Sign-On

Johann Petschenka and Holger Hinzmann (third and fourth from the left) accepted the award from SAP

Darmstadt, November 15th 2012.- SAP partner SECUDE received the "SAP Innovation Partner of the Year 2012" award after only eight months partnership. SAP honors SECUDE with this award as innovative SI Value-added Reseller partner. The solution Single Sign-On, originally developed by SECUDE and based on SAP NetWeaver, improves the level of IT security and increases at the same time the usability in companies.

"The solution from SECUDE comes just from a single source: a solution that is economical and facilitates the work of the IT-Hotline, and to the professional know-how of the employees," said Benjamin Kaulich, Head of Global Eco System and Partner Group Switzerland. "Customers benefit from the consulting expertise of the sales- and pre-sales-team." The innovative solution SAP NetWeaver Single Sign-On impressively documents how to solve the balance between security, usability, and cost sensitivity in business, praised Benjamin Kaulich at the award ceremony of SAP (Schweiz) AG in Regensdorf. Thus, SAP NetWeaver Single Sign-On is a great contribution to the increasingly topical issue of "IT security in the conflict between human and technology".

SAP NetWeaver Single Sign-On is the SAP acquired and improved Single Sign-On solution based on the technology SECUDE Secure Login. Secure Login is a solution for authentication and Single Sign-On, which is customized to the needs of customers. The authentication of the user with SAP user name and password is thereby replaced by a stronger authentication process, the complex password rules and regular password changes and renders them null. Because parts of SAP NetWeaver Single Sign-On were developed in-house, the IT security experts from SECUDE are the best experts and consultants for this solution. "

SAP NetWeaver Single Sign-On is one of the main topics which will be presented at the Security Forum in Allianz Arena - Munich, on November 15th 2012. In addition, other current topics on agenda: News about file and folder encryption with advanced security, security risk of mobile computing, digital monitoring service and industrial espionage versus economic protection. The Security Forum in Munich is the last of the Security Forum Series 2012. Registration is still possible.

About SECUDE

SECUDE is an innovative global provider of IT data protection solutions. The company was founded in 1996 as collaboration between SAP AG and the Fraunhofer Institute in Germany to develop security solutions. In early 2011, SECUDE sold it's business area Application Security Solutions to SAP AG, in order to refocus on the core competence - Endpoint Security. SECUDE helps customers to protect their sensitive data against loss and theft and supports them to comply with various laws and industrial regulations.

By the end of 2011, SECUDE became a member of the SAP® PartnerEdge™ program and Value-added-Reseller (VaR) channel partner of SAP Deutschland AG & Co. KG. Since February 2012 SECUDE was also appointed as channel partner of SAP (Schweiz) AG. Besides own product solutions, SECUDE offers to customers Software Licenses, Consulting and Implementation Services of SAP NetWeaver® Single Sign-On.

Currently SECUDE employs more than 100 qualified employees and has the trust of a large number of Fortune 500 companies, including many DAX-listed companies. SECUDE has subsidiaries in Europe, North America and Asia.
